## Fire Patrol Report

August 2017

August we received significant rainfall as the monsoon continued to be very active in the first half of the month. These wet conditions limited the numbers of campers in the area and even caused cancelation of fire patrols on the second weekend of the month. Another contributing factor to fewer campers was the closure of the Water Wheel recreation area due to public safety concerns of flash flooding from monsoon storms. On Saturday August 12 there was a significant flash flood on the East Verde River that was the result of extremely heavy rain in the Washington Park area over a period of less than 2 hours.
